SUMMARY

Aspiring Full Stack Developer with a strong foundation in Front-End Development (HTML, CSS, JavaScript) and Python/C programming. First-year Computer Science Engineering student with a CGPA of 8.95, 70+ LeetCode problems solved, and 3 independent projects published on GitHub. Currently undergoing a Full Stack Developer internship at WSPL, applying web development skills in a real-world engineering environment. Certified in JavaScript, AI fundamentals, and Python through IBM, Coursera, and NASSCOM programs.

EXPERIENCE

Web Developer Intern — WSPL

Jun 2026 – Present

- Undergoing training in full stack web development concepts, tools, and development workflows
- Completing assigned learning tasks and strengthening fundamentals in HTML, CSS, JavaScript, Python, and C

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML, CSS

Web Development: Responsive Web Design

Core Concepts: Basic Data Structures, Problem Solving, Debugging

Tools & Version Control: Git, GitHub, VS Code, Command Line Interface (CLI)

Practice Platforms: LeetCode (70+ problems solved)

EDUCATION

B.E. Computer Science & Engineering — K S Rangasamy College of Technology, Tiruchengode

2025 – 2029

CGPA: 8.95 / 10 (First Year)

PROJECTS

Responsive Login Page | HTML, CSS, JavaScript (GitHub)

May 2026

- Engineered a fully responsive login page with mobile-first CSS, password visibility toggle, and interactive form validation
- Structured breakpoint-based layouts ensuring consistent UI across desktop, tablet, and mobile screens

Number Guessing Game | Python (GitHub)

Feb – Mar 2026

- Designed a CLI game with 3 difficulty levels (Easy, Medium, Hard), dynamic hints, and session replay
- Implemented comprehensive input validation handling non-numeric, empty, and out-of-range inputs without crashing

Tic-Tac-Toe Game | C Language (GitHub)

Dec 2025 – Jan 2026

- Developed a 2-player console game in ~120 lines of C with win/draw detection across 6 combinations and replay system
- Modularized game logic, input handling, and display into dedicated functions for clean structure

CERTIFICATIONS

JavaScript Fundamentals — Cursa (The Net Ninja)

Apr 2026

- Completed full JavaScript course covering variables, functions, DOM manipulation, loops, and arrays

AI Fundamentals — IBM SkillsBuild

Apr 2026 – Present

- Studying core AI and machine learning concepts through IBM's official certification program

Python for Everybody — Coursera, University of Michigan (In Progress)

Apr 2026 – Present

- Building Python fundamentals — variables, loops, functions — with hands-on problem-solving exercises

Digital Edge 101 — GOLD Level — NASSCOM

Feb – Mar 2026

- Achieved Gold certification — top performance bracket among all participants

Yuva AI for All — NIELIT

Mar 2026

- Completed a national-level orientation program on AI fundamentals and real-world applications

ACHIEVEMENTS

- Solved 70+ LeetCode problems covering Arrays, Strings, Basic Algorithms, and Problem Solving — consistent daily practice with focus on time complexity
- Published 3 complete software and web projects on GitHub independently before finishing first year of engineering
- Achieved CGPA of 8.95/10 in first year of B.E. Computer Science and Engineering
- Gold rank in NASSCOM Digital Edge 101 — scored in top performance bracket nationally
